

## **ECOTANK**

**Portable tanks for temporary oil storage**

**ECOTANKS are designed for the temporary storage of any type of oil or liquid. Their transportability, quick and easy assembly, light yet robust construction and large storage capacity give the tanks a unique versatility and make them ideal for emergency response services. ECOTANKS are equipped with a valve and camlock connection at their base, allowing for decanting or emptying of the system.**

# ECOTANK Portable tanks for temporary oil storage

## Technical Specifications

ECOTANK	7.5	10	15
Footprint Ø [m]	3.6	3.6	4.2
Total height [m]	1	1.5	1.5
Maximum capacity [m3]	7.5	10	15
Fabric type	EVATEX		
Fabric weight [g/m2]	1000	1000	1000
Weight [kg]	57	68	76
Discharge system	Ball valve with 2" male camlock coupling		

- Foldable fabric: EVA-coated polyester. This strong yet lightweight material is resistant to oil, a wide range of chemicals and detergents, and UV light.
- Sturdy frames: Made of marine grade aluminium tubes with high resistance plastic fittings reinforced with fibre glass, making the tanks very easy to assemble.
- Roof cover: Made of oil and UV resistant fabric, included as standard.
- Storage box: ECOTANKS come complete with a sturdy wooden transport case.
